## FLIGHTSAFETY ANNOUNCES NEW AIRCRAFT ELECTRONIC TECHNICIANS COURSE ACCREDITED BY THE NATIONAL CENTER FOR AEROSPACE & TRANSPORTATION TECHNOLOGIES

**LaGuardia Airport, New York (May 8, 2009)** – FlightSafety International is pleased to announce a new Aircraft Electronic Technicians Course accredited by the National Center for Aerospace & Transportation Technologies (NCATT).

“The National Center for Aerospace & Transportation Technologies has developed national standards that support the advancement of avionics and electronics education and training. Receiving accreditation by this organization demonstrates our dedication to offer Maintenance Technicians industry leading courses that help advance careers,” said Mike Lee, Director of Maintenance Training, FlightSafety International.

This course is designed as a foundation for the building block approach to avionics training and provides comprehensive understanding of the fundamentals of electrical and avionics technology. Classroom training focuses on both the theoretical and practical aspects of “theory of circuit operation” to enhance knowledge of aircraft systems and improve troubleshooting skills. All classroom training is reinforced by practical exercises using electrical/electronic trainers and introduces the practical use of test equipment such as oscilloscopes and multi-meters.

The new Aircraft Electronic Technicians Course is offered at FlightSafety’s Savannah Maintenance Learning Center. It is not specific to any one aircraft type and will benefit A & P Technicians and Avionics Technicians who want to expand or update their skills. Successful completion of this course can help to prepare technicians for Aircraft Electronic Technician Certification through NCATT testing.

FlightSafety’s Savannah Maintenance Learning Center conducts comprehensive training for aircraft maintenance technicians for a variety of Gulfstream Aircraft and is located adjacent to Gulfstream’s Savannah facility and FlightSafety’s Savannah Pilot Learning Center. FlightSafety’s Savannah Pilot Learning Center features ten FlightSafety built simulators, including those for the Gulfstream GIV, Gulfstream GV, Gulfstream G450, and Gulfstream G550 aircraft.

FlightSafety International is the world’s premier professional aviation training company and supplier of flight simulators, visual systems and displays to commercial, government and military organizations. We provide more than a million hours of training each year to pilots, technicians and other aviation professionals. FlightSafety operates the world’s largest fleet of advanced full flight simulators at our extensive network of Learning Centers located in the United States, Canada and Europe.
